Before we begin a couple of definitions...

- Generative AI
- Belonging

How do you see AI impacting the art of teaching and what are the implications for student connections and engagement?

Are there ways AI can be applied to directly impact student sense of connection and belonging?

Libby, you got this! Try my "Stop Freaking Out" playlist – it calms me down and keeps me going when I feel like giving up. We are here supporting you!

Connect with other parent-students and tackle challenges together. We're here to offer support and resources.

Are there ways that AI could improve interaction between students with diverse backgrounds and experiences?

How do you see
advancements in AI
impacting issues of equity
and access in education?

Thank You!
